TA Evaluations Fall 2018

201831 150 507

Byeongsu Yu

Total number of evaluations submitted: 4

Total number of students enrolled in class: 15

Percentage of students who submitted an evaluation: 26.7

Total on each answer:

The TA seemed well-prepared for recitation and/or lab.

Agree:1 Neutral:3

Quizzes/homeworks/projects were graded fairly and returned within a reasonable period of time.

Definitely agree:2 Agree:2

The TA was in control of the direction of the class.

Definitely agree:1 Agree:2 Neutral:1

The TA genuinely tried to help the students learn the material and showed concern for their progress.

Definitely agree:2 Agree:2

Compared with all the TAs I have had in college, this TA was one of the best.

Neutral:1 Disagree:2 Definitely disagree:1

Do you recommend this TA?

Yes:2 No:2

Short answer:

Please comment on the book, help session and week-in review as it pertains to your course.

- The lab helped quiz my knowledge from lecture and work with groups.
- No

- Yes I liked being able to go over material twice.

Please comment about the instructor: What did (s)he do that you would want to remain the same?
What did (s)he do that you would change?

- He's nice
- Very friendly.

Please comment about the course: What would you keep the same? What would you change?

- Late
- On more than one occasion he did algebra wrong.

Do you recommend your instructor? Why or why not?

- Not very
- Very.

Please comment on the use, if any, of technology (computers, graphing calculators, online homework system, etc.) in this course:

What would you keep the same? What would you change?

- He gets stuff wrong
- Very nice and draws out the lesson on the board.

TA Evaluations Fall 2018

201831 150 508

Byeongsu Yu

Total number of evaluations submitted: 4

Total number of students enrolled in class: 16

Percentage of students who submitted an evaluation: 25

Total on each answer:

The TA seemed well-prepared for recitation and/or lab.

Definitely agree:1 Agree:3

Quizzes/homeworks/projects were graded fairly and returned within a reasonable period of time.

Definitely agree:2 Agree:2

The TA was in control of the direction of the class.

Definitely agree:1 Agree:3

The TA genuinely tried to help the students learn the material and showed concern for their progress.

Definitely agree:1 Agree:3

Compared with all the TAs I have had in college, this TA was one of the best.

Agree:2 Neutral:1 Disagree:1

Do you recommend this TA?

Yes:3 No:1

Short answer:

Please comment about the instructor: What did (s)he do that you would want to remain the same?

What did (s)he do that you would change?

- Very kind.

- He always explained the section we did in class that week before handing out the worksheet.

Please comment about the course: What would you keep the same? What would you change?

- N/A
- None

Do you recommend your instructor? Why or why not?

- No technology used
- We didn't use any.

Please comment on the book, help session and week-in review as it pertains to your course.

- No
- Yes

Please comment on the use, if any, of technology (computers, graphing calculators, online homework system, etc.) in this course:

What would you keep the same? What would you change?

- He was a kind and patient teacher.
- He knows what he's talking about.

TA Evaluations Fall 2018

201831 150 509

Byeongsu Yu

Total number of evaluations submitted: 7

Total number of students enrolled in class: 16

Percentage of students who submitted an evaluation: 43.8

Total on each answer:

The TA seemed well-prepared for recitation and/or lab.

Definitely agree:1 Agree:4 Neutral:1 Disagree:1

Quizzes/homeworks/projects were graded fairly and returned within a reasonable period of time.

Definitely agree:5 Agree:2

The TA was in control of the direction of the class.

Definitely agree:2 Agree:3 Neutral:1 Disagree:1

The TA genuinely tried to help the students learn the material and showed concern for their progress.

Definitely agree:3 Agree:3 Neutral:1

Compared with all the TAs I have had in college, this TA was one of the best.

Definitely agree:1 Agree:1 Neutral:2 Disagree:2 Definitely disagree:1

Do you recommend this TA?

Yes:5 No:2

Short answer:

Please comment about the instructor: What did (s)he do that you would want to remain the same?

What did (s)he do that you would change?

- he tried his best

- Very friendly and helpful
- He always tried to explain as much as possible
- He was very friendly, he knew his stuff when it came to covering it in each recitation period, and he was always open to questions.
- He was approachable.

Please comment about the course: What would you keep the same? What would you change?

- he wasnt a effective communicator, didnt explain much
- He has a thicker accent but it did not affect the class that much, only some minor miscommunications.
- As English is not his first language it made it difficult for him to find the right words to explain things how he wanted to so at times his explanations were not completely clear.

Do you recommend your instructor? Why or why not?

- good
- Just online homework
- Effective
- Average.
- He rarely used technology.

Please comment on the book, help session and week-in review as it pertains to your course.

- no
- Yes
- No
- I felt it prepared me for more challenging problems than what we covered in the lecture notes.
- Yes.

Please comment on the use, if any, of technology (computers, graphing calculators, online homework system, etc.) in this course:

What would you keep the same? What would you change?

- not very effective at teaching
- He was very nice and always tried to answer our questions
- I can tell he is passionate in both teaching and in the subject of math. He was very knowledgeable in all aspects of this course so I felt his teaching was solid and confident.

TA Evaluations Fall 2018

201831 150 512

Byeongsu Yu

Total number of evaluations submitted: 2

Total number of students enrolled in class: 14

Percentage of students who submitted an evaluation: 14.3

Total on each answer:

The TA seemed well-prepared for recitation and/or lab.

Definitely agree:1 Agree:1

Quizzes/homeworks/projects were graded fairly and returned within a reasonable period of time.

Definitely agree:1 Agree:1

The TA was in control of the direction of the class.

Definitely agree:1 Agree:1

The TA genuinely tried to help the students learn the material and showed concern for their progress.

Definitely agree:1 Agree:1

Compared with all the TAs I have had in college, this TA was one of the best.

Agree:1 Neutral:1

Do you recommend this TA?

Yes:2

Short answer:

Please comment about the instructor: What did (s)he do that you would want to remain the same?

What did (s)he do that you would change?

- He answered all our questions

Please comment about the course: What would you keep the same? What would you change?

- He taught some material differently than we learned in lecture
- Sometimes he was difficult to understand

Do you recommend your instructor? Why or why not?

- Didn't use technology on the worksheets

Please comment on the book, help session and week-in review as it pertains to your course.

- Worksheets were good review
- Yes

Please comment on the use, if any, of technology (computers, graphing calculators, online homework system, etc.) in this course:

What would you keep the same? What would you change?

- He was a good teacher who explained things well
- He is a genuine person who understands the material they are teaching.

Mathematics

TA Evaluations Spring 2019

201911 150 501

Byeongsu Yu

Total number of evaluations submitted: 9

Total number of students enrolled in class: 14

Percentage of students who submitted an evaluation: 64.3

Total on each answer:

The TA seemed well-prepared for recitation and/or lab.

Definitely agree:4 Agree:2 Neutral:3

Quizzes/homeworks/projects were graded fairly and returned within a reasonable period of time.

Definitely agree:7 Agree:2

The TA was in control of the direction of the class.

Definitely agree:5 Agree:3 Neutral:1

The TA genuinely tried to help the students learn the material and showed concern for their progress.

Definitely agree:5 Agree:4

Compared with all the TAs I have had in college, this TA was one of the best.

Definitely agree:3 Agree:2 Neutral:3 Definitely disagree:1

Do you recommend this TA?

Yes:6 No:3

Short answer:

Please comment about the instructor: What did (s)he do that you would want to remain the same?

What did (s)he do that you would change?

- He was very helpful with the recitation assignments and explained the problems in a way that was

easy to understand.

- The way he would review
- Cared, would explain as many times as we needed
- he was always on time and never minded helping
- very nice, tried hard, knowledgable
- He knew the Material well.

Please comment about the course: What would you keep the same? What would you change?

- N/A
- The feeling that he didn't know the way that the prof taught
- Hard to understand
- he was almost impossible to understand due to his accent. There's nothing wrong with that, but its very hard for students who already don't understand a concept to learn when they have no idea what he's saying
- strong accent, poor hand writing, awkward
- He was very hard to understand, extremely hard.

Do you recommend your instructor? Why or why not?

- Fairly effective
- N/A
- We didn't really use it, but we didn't need it and I got more out of the class from using paper. Paper doesn't tell you what you got wrong, but it does have all your work in one concise place, and is convenient for a T A to correct.
- he just used whiteboards
- na
- He used the board but I didn't have a problem with that.

Please comment on the book, help session and week-in review as it pertains to your course.

- Yes
- Yes
- Yes
- yes
- no
- Not really, the assignments were good because they were good practice. but I can't say that going to recitation really helped me learn.

Please comment on the use, if any, of technology (computers, graphing calculators, online homework system, etc.) in this course:

What would you keep the same? What would you change?

- The TA was very helpful and did a good job of reinforcing the subjects we covered.
- Overall a good TA
- Others might have a harder time understanding him. Personally I was ok but some peers weren't as much.
- because what he taught often had to be corrected by the professor, and he was very hard to

understand making learning the new concepts infinitely more challenging. while he was great at math and very smart, it didnt really matter since you had no idea what he was talking about

- above
- He knew the material and Math is the universal language after all. So not being able to understand him very well is not reason enough for me not to recommend him.

Mathematics

TA Evaluations Spring 2019

201911 150 502

Byeongsu Yu

Total number of evaluations submitted: 7

Total number of students enrolled in class: 10

Percentage of students who submitted an evaluation: 70

Total on each answer:

The TA seemed well-prepared for recitation and/or lab.

Definitely agree:2 Agree:3 Neutral:1 Disagree:1

Quizzes/homeworks/projects were graded fairly and returned within a reasonable period of time.

Definitely agree:4 Agree:2 Disagree:1

The TA was in control of the direction of the class.

Definitely agree:2 Agree:4 Neutral:1

The TA genuinely tried to help the students learn the material and showed concern for their progress.

Definitely agree:2 Agree:4 Neutral:1

Compared with all the TAs I have had in college, this TA was one of the best.

Definitely agree:2 Neutral:2 Disagree:2 Definitely disagree:1

Do you recommend this TA?

Yes:4 No:3

Short answer:

Please comment about the instructor: What did (s)he do that you would want to remain the same?

What did (s)he do that you would change?

- The TA would go over step by step explaining how to get to the answer.

- Would answer questions on material not originally going to be covered.
- His willingness to explain and help students understand where they previous misunderstood
- His willingness to help students out with questions they had about the homework. He would go into detail of how to solve a problem, albeit in a different method from what we had learned in class, but an effective method nonetheless.
- He seemed to understand the content very well

Please comment about the course: What would you keep the same? What would you change?

- He occasionally did not know how to answer some of the online questions and this required me to go to my teachers office hours more often.
- It was originally difficult to read his handwriting, but it can be understood after 3ish classes
- He was all-around a wonderful instructor but he wouldn't necessarily know how to solve a problem the way we were taught during lecture. He would solve it using an advanced/different method and it would sometimes be confusing, especially since it collided with the methods taught during lecture.
- He worked too fast

Do you recommend your instructor? Why or why not?

- He did not know how some of the questions were required to be entered into the computer.
- NA
- Technology was not used during recitation. Instead, the TA used traditional means of teaching our classes: markers and whiteboard. Regardless of the way he taught, he still got concepts across to students and was very helpful when asked questions about homework.
- He didn't use any

Please comment on the book, help session and week-in review as it pertains to your course.

- Yes
- No
- Yes
- By reviewing materials that we went over in the previous lesson and emphasizing certain areas that may have been struggle areas for students, waking up at 7am was definitely worth it. Recitation was good, especially for me, who struggles greatly with mathematics in general.
- Yes

Please comment on the use, if any, of technology (computers, graphing calculators, online homework system, etc.) in this course:

What would you keep the same? What would you change?

- He was overall a great help and most of the time answered questions that I would have had to go to office hours to answer.
- Felt that his grasps on the concepts were shaky at best. No matter how intelligent someone is, if they cannot express it to another person then it's meaningless to be a TA
- Even though he sometimes goes into concepts that aren't what were taught in lecture, Byeongsu is a good TA who knows his stuff, and his kindness is always welcome.
- He helped

Texas A&M University

Mathematics

TA Evaluations Spring 2019

201911 150 503

Byeongsu Yu

Total number of evaluations submitted: 10

Total number of students enrolled in class: 14

Percentage of students who submitted an evaluation: 71.4

Total on each answer:

The TA seemed well-prepared for recitation and/or lab.

Definitely agree:4 Agree:5 Disagree:1

Quizzes/homeworks/projects were graded fairly and returned within a reasonable period of time.

Definitely agree:7 Agree:2 Neutral:1

The TA was in control of the direction of the class.

Definitely agree:5 Agree:3 Neutral:1 Disagree:1

The TA genuinely tried to help the students learn the material and showed concern for their progress.

Definitely agree:8 Agree:2

Compared with all the TAs I have had in college, this TA was one of the best.

Definitely agree:2 Agree:4 Neutral:3 Definitely disagree:1

Do you recommend this TA?

Yes:9 No:1

Short answer:

Please comment about the instructor: What did (s)he do that you would want to remain the same?

What did (s)he do that you would change?

- He was very enthusiastic

- He was very helpful in regards to explaining concepts
- He was always very cheerful & made sure you understood what he was going over
- He was very cheerful and tried to answer everyone's questions
- Made sure all material was understood well
- literally the nicest guy, and answered all of my questions! he is great, just may over complicate some explanations.
- he was very dedicated to making sure he explained it all thoroughly

Please comment about the course: What would you keep the same? What would you change?

- At times he incorporated topics beyond the scope of the course into his explanations and people would get confused
- At times was hard to understand and would occasionally go too much into depth on a subject when it could be explained in simpler terms.
- Nothing
- Sometimes he worked problems out a lot differently than we learned in lecture & that confused me
- It was hard to understand him at times
- Sometimes explanations were confusing
- sometimes it felt like he added unnecessary steps that made the overall process confusing

Do you recommend your instructor? Why or why not?

- N/A
- Didn't use technology often.
- we didn't really use technology a bunch due to the class not allowing calculators
- Very
- Electronics weren't really used in this class
- we didn't even use calculators :/
- NA

Please comment on the book, help session and week-in review as it pertains to your course.

- Yes
- Unfortunately not. At times made some things more confusing.
- Yes
- For some units it was very helpful, other times I found myself more confused than I started
- No, there were some conflicting explanations
- No
- recitation helped a little bit
- sure

Please comment on the use, if any, of technology (computers, graphing calculators, online homework system, etc.) in this course:

What would you keep the same? What would you change?

- Very knowledgeable and can explain topics well
- The TA was difficult to understand and occasionally made concepts harder to comprehend.
- He helped me understand topics better, and if he explained something wrong; would admit to his

fault and correct it

- He is very willing to teach the material
- super sweet and stand up guy! is very willing to help!
- He did what he needed to help us

Texas A&M University

Mathematics

TA Evaluations Spring 2019

201911 150 504

Byeongsu Yu

Total number of evaluations submitted: 10

Total number of students enrolled in class: 12

Percentage of students who submitted an evaluation: 83.3

Total on each answer:

The TA seemed well-prepared for recitation and/or lab.

Definitely agree:2 Agree:6 Neutral:2

Quizzes/homeworks/projects were graded fairly and returned within a reasonable period of time.

Definitely agree:3 Agree:7

The TA was in control of the direction of the class.

Definitely agree:2 Agree:6 Neutral:2

The TA genuinely tried to help the students learn the material and showed concern for their progress.

Definitely agree:3 Agree:6 Neutral:1

Compared with all the TAs I have had in college, this TA was one of the best.

Definitely agree:1 Agree:2 Neutral:5 Disagree:1 Definitely disagree:1

Do you recommend this TA?

Yes:6 No:4

Short answer:

Please comment about the instructor: What did (s)he do that you would want to remain the same?

What did (s)he do that you would change?

- was nice and helpful and encouraged questions

- He was nice and helpful
- he really cared and would have been probably the best TA i've had.
- Love his enthusiasm for the subject
- Very kind and helpful when asked questions.

Please comment about the course: What would you keep the same? What would you change?

- sometimes went off on tangents or taught problems in unfamiliar ways that were confusing
- Sometimes he didn't do things exactly like the professor wanted us to do problems
- His accent made him very very hard to understand about half the time.
- Sometimes he would contradict himself and confuse us.

Do you recommend your instructor? Why or why not?

- Recitation wasn't as helpful as homework assignments, sometimes made the concepts confusing
- Helpful
- he never used any. He just used the chalkboard and never needed technology
- The technology was very effective that it kept our homework organized and kept track of our grades
- The online homework does not correlate very well to the tests in my opinion.

Please comment on the book, help session and week-in review as it pertains to your course.

- Not necessarily
- Kind of
- Yes
- It gave more examples over a topic we learned. It was helpful to refresh our minds and get a little more practice
- Not really
- Not at all.

Please comment on the use, if any, of technology (computers, graphing calculators, online homework system, etc.) in this course:

What would you keep the same? What would you change?

- Although he was friendly and ready to help, many concepts were just made more difficult to understand. A lot of teaching methods didn't line up with lecture
- He was on time and explained things well
- He was helpful but too hard to understand.
- difficult to understand but did his best
- At times he can be very confusing. But he's a sweet person.

TA Evaluations Spring 2019

201911 150 505

Byeongsu Yu

Total number of evaluations submitted: 9

Total number of students enrolled in class: 13

Percentage of students who submitted an evaluation: 69.2

Total on each answer:

The TA seemed well-prepared for recitation and/or lab.

Definitely agree:3 Agree:5 Neutral:1

Quizzes/homeworks/projects were graded fairly and returned within a reasonable period of time.

Definitely agree:3 Agree:6

The TA was in control of the direction of the class.

Definitely agree:2 Agree:3 Neutral:2 Disagree:2

The TA genuinely tried to help the students learn the material and showed concern for their progress.

Definitely agree:3 Agree:5 Disagree:1

Compared with all the TAs I have had in college, this TA was one of the best.

Definitely agree:1 Agree:2 Neutral:3 Disagree:1 Definitely disagree:2

Do you recommend this TA?

Yes:6 No:2

Short answer:

Please comment about the instructor: What did (s)he do that you would want to remain the same?

What did (s)he do that you would change?

- He explained any questions we had

- He was really helpful with the recitation assignments
- He was very smart about the subject
- He was very understanding and had a good attitude
- Sometimes the way that he explained things were different than our instructor and it gave a different view on how to approach the problems.
- The TA was helpful explaining the homework and concepts in lecture but with a different view.

Please comment about the course: What would you keep the same? What would you change?

- n/a
- Sometimes hard to understand
- Sometimes the way he explained concepts didn't make a whole lot of sense. I sometimes felt like he took a complicated way around some of them.
- It was hard to understand his accent, very difficult to move along with the concept if I can't understand what he is trying to convey.
- His accent was a bit difficult for me to understand
- He didn't make the class engaged.
- The TA gave a different way to view topics that made understanding them easier.
- His ability to speak clearly

Do you recommend your instructor? Why or why not?

- Very effective
- We didn't use it very much.
- We didn't use technology all homework on paper.
- It was alright
- Very effective
- Homework system worked well for repetition, however it didn't have any help with solving if you got stuck.

Please comment on the book, help session and week-in review as it pertains to your course.

- Yes
- Not really
- The recitation assignments definitely helped
- Yes it helped being able to ask questions in a smaller environment.
- Yes
- Yes
- Yes, the recitation helped with showing how the problems would look in the exams.

Please comment on the use, if any, of technology (computers, graphing calculators, online homework system, etc.) in this course:

What would you keep the same? What would you change?

- He gives you the opportunity to ask questions and explains the answers in different ways
- Even though he explained things in a confusing way sometimes he was still incredibly helpful and available when you needed outside help
- Overall hard to learn from.

- He is a good person
- He knows what he was doing.
- The TA helped a lot with going over the recitation examples.
- He cannot speak clearly

Total number of evaluations submitted: 11

Total number of students enrolled in class: 13

Percentage of students who submitted an evaluation: 84.6

Total on each answer:

The TA seemed well-prepared for recitation and/or lab.

Definitely agree:5 Agree:5 Definitely disagree:1

Quizzes/homeworks/projects were graded fairly and returned within a reasonable period of time.

Definitely agree:7 Agree:2 Neutral:1 Definitely disagree:1

The TA was in control of the direction of the class.

Definitely agree:6 Agree:3 Neutral:1 Definitely disagree:1

The TA genuinely tried to help the students learn the material and showed concern for their progress.

Definitely agree:7 Agree:2 Neutral:1 Definitely disagree:1

Compared with all the TAs I have had in college, this TA was one of the best.

Definitely agree:5 Neutral:4 Disagree:1 Definitely disagree:1

Do you recommend this TA?

Yes:9 No:2

Short answer:

Please comment about the course: What would you keep the same? What would you change?

- He can be a little difficult to understand
- I don't have a specific quality he was a very good TA

- Doesn't communicate clearly
- Nothing, he's great!
- I can't think of any negative qualities
- hard to understand a little but not too bad
- He was a little quiet but he was great!
- Hard to understand at times
- N/A

Do you recommend your instructor? Why or why not?

- Didn't really use technology
- The website is very organized to find the homeworks and print them
- N/W
- Technology was pretty good, not really allowed to use calculators in this class so..
- The homework helped, doing practice problems helped me understand the concepts
- n/a
- We had none
- Online Homework helped learning through repetition
- We didn't use much technology for recitation.

Please comment on the book, help session and week-in review as it pertains to your course.

- Yes
- Yes
- Somewhat
- Yes. Having to do a worksheet each week was helpful, and when I had questions about it they were thoroughly explained.
- Yes because of the recitation assignments
- yes very much so
- Yes
- Yes
- Slightly, but I also would have preferred to just study on my own as opposed to being guided so much.

Please comment about the instructor: What did (s)he do that you would want to remain the same?
What did (s)he do that you would change?

- He went over our questions and always gave extra examples to help us understand the material
- He knew the material
- He is excited about teaching, loves his class and is great at helping when we have questions.
- He always answered our questions
- He was very understanding and helpful
- He was always really helpful and willing to answer questions.
- Was able to answer any question math related
- He was very understanding, and patient with all questions asked in class.

Please comment on the use, if any, of technology (computers, graphing calculators, online homework system, etc.) in this course:

What would you keep the same? What would you change?

- He's a good TA and knows a lot about the topic
- Communication
- He is very intelligent and passionate about this class. Good at giving examples and explaining what is going on. Sometimes is able to give insight to what we should PAY extra attention to, gives us little tricks to remember small things
- He is very helpful and is able to answer your questions
- he is very nice and understanding and will go over any questions or problems you have with you
- He was a wonderful teacher and very patient, I hope he does well in the future.
- Great overall experience
- He cares about his students, and has great patience, and we can tell that he truly just wants to make sure we understand, and to give us heads ups about things to watch out for

Item Comments

Items on the Appraisal

I was usually prepared for class.

Comments from Students

1. [B] Notes were always posted online.
2. [B] I showed up to every single class and took notes
3. [A] Content for class was always posted or sent ahead of the class so that students were prepared when they walked in.

On average I studied ___ hours per week for this course (strongly agree=12, agree=9-11, neutral=6-8, disagree=3-5, strongly disagree=0-2).

Comments from Students

1. [E] Did not study
2. [B] Lots of homework and studied for extensive times before exams.

My TA was organized and prepared for each class.

Comments from Students

1. [B] Always had course material emailed before class.
2. [A] Never missed sending us the items we would go over in class
3. [A] Best TA for Cal 1
4. [A] My TA was always very prepared for each class, always early, and always eager to teach.

My TA explained concepts clearly.

Comments from Students

1. [D] I cant understand broken English more than half the time.
2. [A] Communicated difficult concepts in a very understandable manner that effectively helped students learn the material.

My TA was accessible outside of class.

Comments from Students

1. [B] Office hours were always negotiable.
2. [B] responded to emails and helped before and after class
3. [A] The TA was always available outside of class.

My TA returned assignments in a timely manner with appropriate feedback.

Comments from Students

1. [B] Always had assignments returned following lecture.
2. [A] returned items the class after taking/turning in
3. [A] Any errors made on assignments were explained very clearly and the assignments were always returned within a week.

My TA fostered a learning environment that was respectful of all students.

Comments from Students

1. [C] I could not understand broken English.
2. [A] Byeongsu was the nicest, most helpful TA he could be

3. [A] Very respectful to all students every session.

My TA was receptive to students asking questions in class and supplied clear explanations.

Comments from Students

1. [B] Always attempted to answer questions to best of his ability.
2. [A] Never shot down a hand and always personalized examples
3. [A] Always very willing to answer questions and answered them with in-depth explanations which were very helpful.

I would recommend this class format to another student.

Comments from Students

1. [C] If they can understand broken English.
2. [A] Class gives a good understanding of the study of rates
3. [A] The recitation portion of the course was very helpful in enhancing understanding of the content.

Overall, my TA was effective.

Comments from Students

1. [B] Helpful in the classroom.
2. [A] Most effective TA I have had, helped immensely with any trouble I had with concepts in the course.

I would recommend my TA to another student.

Comments from Students

1. [C] If they can understand him.
2. [A] No doubt would recommend this TA.

Essay Question Comments

Essay Questions on the Appraisal

Please add your overall thoughts on the course and instructor.

1. The best TA at TAMU, always helpful and really focused on learning the material
2. My TA is a very genuine person and I enjoyed seeing him on Mondays and Wednesdays. He was very complimentary to us when we did something right and he helped us when we were down.
3. Mr. Yu is absolutely amazing, always helping on difficult concepts and always accessible.
4. He was hard to understand and didn't actually teach the material. He just threw up the answers on a board for us to copy
5. Byeongsu Yu is an awesome teacher and makes math concepts easy to understand.
6. Mr. Byeongsu Yu is awesome.
7. Very helpful, though difficult to understand.
8. Was overall very helpful and intentions were great, but his very heavy accent made it extremely difficult to understand what he was trying to explain. In no way is this a knock on him, he was great, but it was very difficult to understand him.

9. Class was fun and not too difficult. I enjoyed the teaching style of my TA.
10. The course is a bit pointless, but the instructor was good.
11. Explained how to do labs well, would stop and help you and explain what was going wrong if needed, managed class time well.
12. My TA was effective at demonstrating concepts.
13. It seemed like it should have been more stressful than it was made to be.
14. The coding portion of the course was not really helpful in gaining any understanding of the content and was a waste of time. The recitation portion was very helpful and gave students the opportunity to ask specific questions of the TA and gain a better understanding. The TA was very helpful in teaching the students any gaps from the lecture and going more in depth with the concepts. Even in the coding portion the TA was effective even though this portion did not really help students.

What did your TA do that you found particularly helpful?

1. The best TA at TAMU, always helpful and really focused on learning the material
2. He would work through the most difficult problems in the unit very clearly and broke every step down effectively.
3. Mr. Yu explains complex concepts in very simple terms and makes them much simpler to understand and learn
4. He allowed students to work together on quizzes
5. My TA would work out any problems and answer questions when we needed help
6. Always answered questions.
7. He was readily available to help at all times
8. Explained problems well.
9. He would stop a lab and help you if you were falling behind before moving to next section
10. He was so kind and truly cared about us. He always made us feel good and wanted to make sure we were always prepared !
11. Go through half of the lab with us at the beginning of the week.
12. He was extremely friendly and helpful. He went over the material with us, quickly but thoroughly explaining.
13. MY TA was very kind and welcoming to students as well as extremely receptive to questions. Students left every session without confusion because all concepts were clearly explained.

Item Comments

Items on the Appraisal

I was usually prepared for class.

Comments from Students

1. [A] Always print out lecture notes before class and get to class early to get situated and ready to take days notes.
2. [C] Sometimes the worksheets are not posted until the night before. I sleep early, so I didn't always have the sheets to work with.

On average I studied ___ hours per week for this course (strongly agree=12, agree=9-11, neutral=6-8, disagree=3-5, strongly disagree=0-2).

Comments from Students

1. [B] Spent a ton of time trying to understand the material
2. [D] I normally do the online homework and review notes for quizzes on Thursdays.
3. [B] This course requires a lot of outside study time for me despite the lectures being generally comprehensible.
4. [A] I study a lot for this class because I never understand anything in class.

The course requirements were clear.

Comments from Students

1. [A] Everything was clearly explained in syllabus for course.
2. [D] No course requirements listed really, just topic after topic without much explanation, increasingly harder

I found the following resources to be useful - Textbook

Comments from Students

1. [D] I find the class notes to be the most useful.
2. [E] Never used
3. [E] No resources
4. [D] I have never used the textbook

I found the following resources to be useful - Online homework system

Comments from Students

1. [B] I use these to help prepare for exams
2. [A] Always helps me get practice in.
3. [D] Never shows you the right answer after you got it wrong, doesn't help me learn
4. [A] I love Cengage because you can ask it to generate alternate practice problems. Prof Yu was also very awesome in creating a practice version for each assignment.

I found the following resources to be useful - Help sessions

Comments from Students

1. [C] I have not attended a help session yet this semester.
2. [C] Never went
3. [C] Haven't been due to schedule conflicts.
4. [B] I go to them once a week, sometimes they're very helpful other times it's packed and no one can answer my questions.
5. [C] I haven't gone to one yet.

I found the following resources to be useful - Week-in-review

Comments from Students

1. [C] I have not attended a week-in-review yet this semester.
2. [C] Haven't gone yet
3. [C] same as above
4. [A] Dr. JD Kim is an AMAZING math teacher.

I found the following resources to be useful - Instructor's online materials**Comments from Students**

1. [A] The notes and reviews are very helpful.
2. [C] The only materials available were the blank notes and the filled in notes after the lecture. Though the post lecture notes were hard to understand because they hand written parts were very disorganized.
3. [D] Just class notes online

I found the following resources to be useful - Instructor's office hours**Comments from Students**

1. [C] I have not been to office hours yet.
2. [C] N/A
3. [D] I had to go to my previous math professor during her office hours because it was really hard to understand my teacher currently.

My instructor was organized and prepared for each class**Comments from Students**

1. [A] Always early to class and starts right on time with the day's lecture.
2. [E] He has made plenty of mistakes that I would catch sometimes; however, my frustration came from the times that he would mess up and how are we supposed to know if he was explaining the material correctly.

My instructor explained concepts clearly.**Comments from Students**

1. [D] He has a different way of going about explaining things. In general he is difficult to understand.
2. [E] I cannot understand where he gets certain values or how he does most of his work. He constantly does things incorrectly, so I do not know what is wrong from right. His notes are unorganized and hard to follow as he goes along.
3. [A] Very good at explaining concepts and making sure students understand what he is saying.
4. [E] He would go fast and sometimes skip steps.
5. [E] Can't understand him well, his work is all over the place
6. [D] I never understand anything. sometimes the instructor will do calculations in his mind and I would not get where the numbers came from.

My instructor was receptive to students asking questions in class.**Comments from Students**

1. [A] Always asks for questions before moving onto next topic in lecture. Takes any questions right away.
2. [A] He is always open to everyone's questions and answered them in full detail.
3. [A] He was always very receptive to anyone's questions and would go to great lengths to make sure he answered their questions to the best of his abilities and was very good at explaining concepts to people with any type of questions.

My instructor was accessible outside of class.**Comments from Students**

1. [A] Has office hours that students are able to attend.

My instructor fostered a learning environment that was respectful of all students.

Comments from Students

1. [A] Everyone feels comfortable in class; I always have, at least.

Overall, my instructor was effective.

Comments from Students

1. [C] I'm having a difficult time in class, but I believe other students are learning effectively.
2. [A] Helps me understand the class content better than if I were to study all on my own.
3. [D] Can't understand him, why would a top college like A&M have their students be taught by someone who's English isn't the best, especially when teaching a topic as hard a calculus

I would recommend my instructor to another student.

Comments from Students

1. [D] Good professor with great teaching habits, just hard to understand sometimes due to his strong accent.
2. [A] Very good math instructor; explains concepts very well.

Essay Question Comments

Essay Questions on the Appraisal

Please add your overall thoughts on the course and instructor.

1. The instructor is eager to help, wants students to ask questions, his written notes are effective and easy to follow, but, he is difficult to understand unfortunately.
2. Great instructor! Very kind and understanding, makes learning top priority.
3. The help sessions, office hours, and week-in-reviews are very nice options for help to utilize. I will start attending in order to improve my grade and prepare for the next exams.
4. Enjoyed the professor since he was very good at explaining concepts and always took great notes on the board that were very easy to read and understand
5. He is a very passionate man that truly cares if we do well or not in his class. He takes time out of his lecture to answer any questions and he highly encourages it. He also emails very quickly and is always reaching out to us.
6. He was hard to understand at times.
7. Hard course with an instructor who does seem to try but overall it is tough to understand him and the material
8. The instructor is hard to understand, but nice.
9. The course itself is quite straightforward and exemplifies what needs to be known for exams/quizzes. The instructor, although just a few times with questionable ways of teaching a concept, is straightforward as well, but is definitely great when it comes to explaining and going out of his way to answer questions the class has.

What recommendations would you make to the instructor for improvement?

1. Speak more clearly
2. Post worksheets earlier
3. Honestly, I can't think of anything that stood out to me that he needed to improve upon.
4. Sometimes he goes too fast, especially on new concepts, so I would try to slow down.
5. Go slower please
6. teaching style is hard to understand
7. Don't over complicate concepts.
8. Be a bit more confident when explaining a concept, you really know the content but sometimes it is hard to understand the concept you are teaching just because of the language used to explain:)

Comments from Students

1. [B] I had previous knowledge of this course.
2. [A] I was always 10 minutes early to class and printed my lecture notes before hand to fill out in class.
3. [E] After we finished a section, it would follow with a quiz, which if you couldn't understand the lecture and had no time to process the information, the outcome would be poor.

On average I studied ___ hours per week for this course (strongly agree=12, agree=9-11, neutral=6-8, disagree=3-5, strongly disagree=0-2).

Comments from Students

1. [C] Studied for quizzes and homework weekly, then more hours come test time
2. [C] I would study most before tests.
3. [C] I would complete the online homework each week and review the weeks notes.
4. [C] I was hard to follow his notes so I often had to find YouTube videos or tutor websites that had different tactics to get the answers.

The course requirements were clear.

Comments from Students

1. [B] The quizzes were slightly inconsistent when we had face to face learning. Also in the syllabus, he stated different formats that the quizzes would be given in and they were always the same style, by yourself in the 10 minutes. That was a disappointing inconsistency.
2. [D] Sometimes tough to understand him
3. [B] I knew what to expect.
4. [A] Everything was clearly stated in the syllabus.
5. [D] The only assignments I was sure about were the Webassign home works because those had set dates.

I found the following resources to be useful - Textbook

Comments from Students

1. [B] Sometimes when I didn't understand lecture I would read the textbook
2. [C] Didn't use
3. [E] I never used the textbook.
4. [E] I never used the textbook while in this class
5. [C] never used
6. [C] I personally didn't resort to the textbook because the class notes and online homework helped me understand the material best.
7. [D] The teacher said that the textbook was not useful

I found the following resources to be useful - Online homework system

Comments from Students

1. [A] The homework correlated to the test and quiz material. Due to their being homework due and also practice homework, it was a great study tool.
2. [A] doing problems and being able to study them as examples is what helped me learn the best
3. [D] Never showed me how to do it or if I missed a question why I missed it. Should at least show me the right answer so I realize what I did wrong

- | |
|---|
| 4. [B] It helped prepare me for the exams. |
| 5. [A] The online homework allowed me to get a lot of practice solving problems and helped me understand the material better. |
| 6. [B] The only practice I could practice the material was on the home works. |
| 7. [B] Teaching myself how to do the math homework was how I survived this class. |

I found the following resources to be useful - Help sessions

Comments from Students

- | |
|--|
| 1. [C] Never attended |
| 2. [C] I did not attend any help sessions. |
| 3. [B] I went to a lot of these and helped me a lot, sometimes too full though and wait time was long |
| 4. [C] never used |
| 5. [C] I didn't attend a help session for this course. |
| 6. [C] I was hard for me to make most help sessions because of time conflicting help sessions for other classes. |

I found the following resources to be useful - Week-in-review

Comments from Students

- | |
|--|
| 1. [C] Never attended |
| 2. [E] i never utilized the week in review |
| 3. [D] Didn't go, Sunday afternoon is a bad time for it |
| 4. [C] never used |
| 5. [A] The week-in-reviews were very helpful in going over the lessons that were going to be on each exam. |
| 6. [C] Same as above |

I found the following resources to be useful - Instructor's online materials

Comments from Students

- | |
|--|
| 1. [C] It was nice that he posted completed notes however they are always very disorganized and therefore hard to get information from. |
| 2. [B] I really appreciate posting the completed notes online |
| 3. [B] notes were very helpful |
| 4. [A] Everything we needed for the class was available on the instructor's website. |
| 5. [D] His notes are disorganized and hard to follow |
| 6. [E] His handwriting is terrible, and the way he writes his notes is incredibly hard to interpret. If you pull them up they consist of a single color block of illegible math and lots of arrows pointing to different parts of the problem. As someone who needed these notes to teach myself the class because I couldn't understand his teaching, they quickly became an unusable resource. |

I found the following resources to be useful - Instructor's office hours

Comments from Students

- | |
|--|
| 1. [C] never used |
| 2. [C] I didn't attend any office hours. |
| 3. [C] I could hardly understand his English, to no fault of his own. |
| 4. [E] If I can't understand him when I ask a question in class there's no way office hours are going to help. |
| 5. [A] would ask for help in hw and questions about the content and would come out with clear understanding |

My instructor was organized and prepared for each class

Comments from Students

1. [D] Frequently in face to face lectures, he had not worked the problems in advance causing him to get the wrong answer on the notes.
2. [B] he was always prepared for class with material and help
3. [A] Always at least 10 minutes early to class and started each lecture on time with the day's lesson.
4. [E] I seemed like he hadn't looked at the material until class, so he made a lot of mistakes.
5. [E] Picture this class: He is explaining a brand new calculus concept. However, instead of explaining it, he simply works out an example from the notes. However, his way of working it out is rapidly writing it down without explaining and just solving the math problem. This is confusing in itself, however, he would reach the end of the problem, and literally 90% of the time someone would raise their hand and point out a mistake. THIS MAN DID THE ENTIRE QUESTION WRONG. And it wasn't just once it was multiple times a class. He would always say he would post the fixed version online later. One time we got to an example on the notes and he literally said "Oh I don't know how to do this so ill try and post it later" Awesome.

My instructor explained concepts clearly.**Comments from Students**

1. [C] Calculus is a hard topic to learn so it could have been on my end that I was not understanding it well because it is hard to understand, however, his class time did not help a ton.
2. [C] While he did explain concepts, there were many times he made mistakes and had to start over or change things making it hard to follow along and understand what to do.
3. [D] sometimes it was hard to follow because the work would be very scattered
4. [E] He seems to struggle w some topics and it's hard to understand him sometime
5. [B] i understood all the lessons he taught
6. [A] The instructor was very good at explaining the concepts and breaking them down into simpler ideas.
7. [E] Here is the thing he is amazing as a person but you can't understand him clearly. He says things that dont make sense. He should not be our instructor
8. [E] Confusing and hard to understand his english
9. [D] He tried to and I believe he thought he was explaining concepts the best he could.
10. [E] See the above answer. But basically he doesn't know how to teach his own class
11. [E] I never understood anything he said. Also the materials were very unclear.

My instructor was receptive to students asking questions in class.**Comments from Students**

1. [A] He went above and beyond to answer the questions asked in class and was able to admit when he was wrong which was helpful.
2. [A] The instructor always paused after giving explanations on each topic to ask for questions and regularly encouraged students to ask questions.
3. [B] my instructor is always helpful when its needed
4. [A] Always stopped to make sure no one had any questions, and if someone did he always called on them immediately to help.
5. [B] except sometimes he doesn't understand the questions asked.
6. [A] He always wanted to clarify things and he appreciated people asking questions and engaging in class
7. [B] He was receptive and very nice, but his answer rarely actually cleared things up.

My instructor was accessible outside of class.**Comments from Students**

1. [A] Response time to emails, especially once we were moved to distance learning was amazing. couldn't have been better.
2. [A] Any time the instructor had to cancel office hours for personal reasons, he offered up to 3 more office hour sessions throughout the week to ensure all the students had time to reach him.
3. [C] yes, but i never used it

4. [A] The instructor had office hours every week.

My instructor fostered a learning environment that was respectful of all students.

Comments from Students

1. [A] The instructor encouraged asking questions and after any student asked a question would always end his explanation by the king the student for asking and would state, "good question!"
2. [A] my instructor knows how to make the students feel comfortable when we are learning
3. [A] Never disrespected me or anyone in the class.
4. [B] He was very inviting and wanted people to do when

Overall, my instructor was effective.

Comments from Students

1. [A] he always teaches very well
2. [A] I feel that he taught all of the concepts in this course very well, and I have a solid understanding of the material.
3. [E] math is hard enough without language barriers
4. [D] I'm sure with others, they could understand of have an impact on what they are learning, however, to me he was not very effective.
5. [E] Nope. I attended this class for the first half of the semester and would end up using youtube/Kahn academy to teach myself the lesson. Rather than wasting my time in class, I started not going and using the time to teach myself. MY GRADES WENT UP.
6. [E] I did not learn anything. I feel like the school made me take this class just to take my money. I had known that I would have to take these kind of classes, I would never have come to this school.

I would recommend my instructor to another student.

Comments from Students

1. [C] sometimes hard to understand
2. [A] Very good at explaining the concepts in different ways so that everyone understands, very patient, wants his students to do well.
3. [D] I had Tripode last semester and made a mistake by not choosing her for this semester.
4. [D] He works quickly which made it difficult for me to keep up at times.
5. [E] Is this even a question.

Essay Question Comments

Essay Questions on the Appraisal

Please add your overall thoughts on the course and instructor.

1. Very kind and understanding
2. Great course
3. Moved slow and made sure students understood each concept
4. Straightforward course and instructor teaching.
5. I've never been a math person (much less calculus), but this course was definitely do-able as long as you keep up with notes and homework (and study!)
6. The instructor gave strong effort every single day inside and outside of the classroom to make sure every student was learning the material and made constant effort to help us in any way possible if a topic was confusing or difficult to understand.

7. Wonderful and very nice professor. However, he is kinda hard to learn from. The language barrier is difficult, but he tries so hard and is a really considerable and respectable person. The subject is hard, and I struggled learning concepts from him.
8. The course was not too difficult. At times, it would be hard to understand the instructor but I was still able to get something out of the lecture.
9. Math 142 is one of the hardest classes I've taken, and the professor didn't help at all with the difficulty, often moved fast too. I don't understand why a prestigious school like A&M hires grad students to teach a hard, required class like math 142. It's disappointing
10. my instructor is good and teaches well although he can be hard to understand at times
11. I enjoyed this course because of the instructor. He was a great instructor and taught the material of this course very well.
12. He was very helpful and welcoming, so I wasn't scared of math like I normally am.
13. I think he is a great person, but you really shouldn't be hiring people that aren't effective teachers. As he steps through problems you can't understand he just jumps.
14. I believe there should be more interaction with the instructor and the students and make the course more interactive.
15. He's actually the worst. He made the class so frustrating, and I can't tell you the number of hours I spent trying to teach myself how to teach myself calculus without even the help of notes.
16. I found that this was difficult class for me, but with Professor Yu's breakdown and accessible help, I was able to get help when I was struggling. For being a beginning lecturer, I think the way he has his class set up is very efficient and easy to understand.

Why would you recommend (or not recommend) your instructor?

1. Disorganized and hard to follow. I had not taken calculus before this class and I feel like I still haven't.
2. I would recommend him for his work ethic, but it is a bit confusing to understand his lecture
3. Knowledgeable about the subject, but also down to earth
4. I would recommend because he ensured all questions were answered
5. I would recommend my instructor because he was always mindful of answering questions during class and explaining thoroughly.
6. He is a very nice man that teaches very well some of the time, but he can be difficult to follow along with due to mistakes and difficult problems that sometimes do not make sense.
7. I'm not sure if I would recommend my professor or not, he was super helpful and cared about students and their grades, but was sometimes hard to follow when giving lectures
8. For the reasons listed above, I feel that any student who gives sufficient effort can succeed with this instructor, and I would, therefore, recommend him to other students.
9. I would not mainly because of how hard it may be to understand him fully. It was his first year so I'm sure he'll get better year by year.
10. He's very hard to understand and goes fast, messes up sometimes as well
11. I would recommend him because I learn well in this class
12. I would recommend my instructor because he teaches the material very well and is patient with all of his students. He wants you to succeed and is always willing to find a different way to explain something if you don't understand the first time.
13. He truly wants you to succeed and will do whatever he can to help you.
14. I could not understand him most of the time. Not related to the subject.
15. With no malice or discrimination intended, his speech is very hard to understand, so to understand his English and then to understand the math is very difficult.
16. I would only recommend him to people I hate.
17. He cares about his students and knows what he's talking about.
18. I would recommend because even though I am not the best at math, the class was made very easy to understand and Yu was very helpful.

What did your instructor do that you found particularly helpful?

1. Responses and interactions were great! Great guy, hard to follow as a teacher.

2. Office hours
3. Showing why things worked rather than calculator syntax
4. Having a day of review in class before tests was helpful for reviewing and improving test scores.
5. our instructor would offer opportunities to help grades (such as dropping the lowest quiz grade), and was really attentive to answering questions students had
6. His constant reminders through email and in class of assignments, help sessions, and office hours enabled students to stay on top of everything. His encouragement of students to ask questions was helpful in creating a fear-free environment where students could feel no shame in struggling to understand a topic.
7. He was able to identify his own mistakes to the class and willing to own up to them.
8. Answered emails fast
9. on my homeworks when i had questions he would always be helpful in answering what I could not do on my own
10. He simplified/broke down the steps for each concept we learned.
11. He didn't move too fast. He was well paced and we got everything done we needed while going slowly enough to understand.
12. Though his notes are very disorganized, I appreciated that he posted them (first blank to print out and then worked out)
13. Well on the first day of class he told us he didn't speak English well so that was great.
14. He always seemed to care how we were doing in his class.
15. I found that the way he explained the concepts was very helpful because he would explain in basic terms unlike other professors that expect you to know math like how they do. Yu was also very responsive to any questions we may have and made time for his students.

What would you recommend that your instructor change?

1. classwork posted as a unit block, so all sections of the chapter could be printed at once
2. Cover all parts of notes
3. Maybe not be so intimidated/nervous at times, you are doing great!
4. pop quizzes at the end of class. a lot of times we would only have about 5 minutes left, which is hardly enough time
5. I would ask that the instructor include more difficult examples in each lecture. Some of the online assignments were significantly harder than the examples included in lecture, which did lead to some confusion and struggle. However, students were still amply able to help themselves through help sessions and office hours, so this should not have hindered anyone from succeeding.
6. Speak in a more clear manner and to keep up what he's doing.
7. Pace of class, more examples and not straight notes. Handwriting is all over the place and hard to follow
8. N/A
9. I don't have any recommendations for change.
10. When it comes to word problems, he wasn't able to explain them in the best way, so I would reference other material to help me.
11. Maybe if he wrote his own notes, he would know the answers beforehand and be able to break the worksheet down in a timely manner.
12. He should probably go over the problems before hand so he doesn't mess up the math, especially the longer questions.
13. I would recommend to change the quizzes or grade scheme, I felt the quizzes were unnecessary but could help sometimes, maybe it be more mixed like some multiple choice like how the test is. Besides that, I think the class is set up good regarding everything else.

What advice would you give another student considering taking this course?

1. Print the lectures
2. Pay attention in class and do the practice
3. Go to class to better learn concepts explained.
4. make sure you keep up with the notes and go to class! do the hw too, even if you don't think you need to (and use it to study)

5. I would tell other students to make sure they complete online assignments and fully understand all material, then go to a help session or office hours session afterward to ensure there are no gaps in knowledge before test dates. I failed to do this on one occasion and it cost me dearly on my first exam.
6. I would say to go to class everyday and be prepared beforehand.
7. Don't take it, if you do, get a tutor.
8. study because calculus is not easy.
9. Come prepared to class with the day's notes, participate in class, ask questions when you don't understand something, and take advantage of office hours/reviews if you need the extra help!
10. Go to the week in reviews! The more times you hear the confusing concepts the more it helps!
11. I would try to go over the notes and try to work them out before class.
12. Better get really good at online math research.
13. Make sure to take time out of your days to study, because although the material isn't too difficult in class, it gets tricky out of class.
14. I would advice them to make plenty of time for studying and practicing. If all you do is the classwork, you wont be as successful unless you know how to solve each concept out of the top of your head. The office hours, help sessions, week in reviews are resources you should take advantage of.

Statistical Summary

Texas A&M University, College Station
Summer 2020
MATH 142 102
End-of-Term
Byeongsu Yu

Demographics

Total Number of Evaluations Submitted: 19

Total Number of Students Enrolled in the Class: 23

Percentage of students who submitted an evaluation: 82.61%

Item Comments

Items on the Appraisal

I was usually prepared for class.

Comments from Students

1. [C] Very difficult subject.
2. [C] I believed I was ready from Math 142, but the online format and professor didn't seem prepared for the month of class and schedule
3. [D] While the blank notes were provided before class I never knew what to expect in any of the upcoming lectures. It would help if a 5 minute video was posted before each class so that I could watch it and become a little more prepared/confident before lecture.

On average I studied ___ hours per week for this course (strongly agree=12, agree=9-11, neutral=6-8, disagree=3-5, strongly disagree=0-2).

Comments from Students

1. [D] Most of the time was spent on homework which I felt was enough to make sure I understood the material.

The course requirements were clear.

There were no comments for this item.

I found the following resources to be useful - Textbook

Comments from Students

1. [C] I did not use a textbook
2. [E] I never used the textbook. If I wanted to look something up, I referenced my notes or googled my question.

I found the following resources to be useful - Online homework system

Comments from Students

1. [B] At times it was and at other times it was entirely confusing. Many things were much different than in class and we never were able to completely understand the problems
2. [D] If I ended up using all my attempts on a question it still wouldn't show me the correct answer/steps to get the right answer which left me lost on some of the homework problems.
3. [B] I found webassign to be easy to use, but I haven't yet taken advantage of its class insights tool.
4. [D] The online homework would prove difficult in explaining exactly what was needed and led to right answers being wrong due to the format.

I found the following resources to be useful - Help sessions

Comments from Students

1. [B] All help session I attended were helpful in some way
2. [C] I didn't use them, so I can't speak to their usefulness. I did know that they were available because the instructor sent information about them.

I found the following resources to be useful - Week-in-review

Comments from Students

1. [C] We didn't really use this
2. [C] I'm not sure what this is. I found his review sessions for tests to be useful.

I found the following resources to be useful - Instructor's online materials

Comments from Students

1. [C] They were hard to read at times (completed notes) and the videos at times were so fast I felt like I was racing to write it down instead of learning
2. [A] I liked following along with his materials on eCampus during the zoom classes so I could see the full document.

I found the following resources to be useful - Instructor's office hours**Comments from Students**

1. [C] I didn't use his office hours, but I knew what time they were because of multiple emails, the syllabus, and class announcements.

My instructor was organized and prepared for each class**Comments from Students**

1. [A] Besides technical difficulties, he was well prepared.
2. [D] During lecture the professor made many mistakes during calculations which made the class hard to follow. It seemed like he was working out the problems first hand during class.

My instructor explained concepts clearly.**Comments from Students**

1. [D] I felt at times that he wasn't able to explain the problems and formulas. He often expected us to know that certain problems ended up the way they were and didn't understand why we didn't. It was difficult because My strong suit isn't math, so I'm already somewhat struggling with the problems and I was also struggling to understand my professors ability's.
2. [D] While the professor is very knowledgeable, there was a language barrier that made the class difficult to understand at times.
3. [B] I liked the way sections 6.3 and 6.4 had visual connections to the concepts. I feel that we could have spent more time connecting concepts and explaining how they work together in the other chapters.
Other than that, I liked the amount of examples we worked through in each section.

My instructor was receptive to students asking questions in class.**Comments from Students**

1. [A] He was always making sure that we were engaged. Almost every class we had at least a few questions guaranteed.
2. [A] EXCELLENT at being open to questions and answering!
3. [A] He wanted to fully answer students' questions. As the course went along, students consistently asked questions, so they must have found his answers useful.

My instructor was accessible outside of class.**Comments from Students**

1. [A] He had office hours everyday and made sure that he was accessible even outside of office hours.
2. [A] I could email him 11 pm on Sunday night and expect a response. Went above and beyond for the students.
3. [A] Very willing to help!! Really appreciated it!!
4. [A] He set multiple office hours a week along with a couple additional times. He also worked with students who couldn't meet during those times to accommodate their schedules.

My instructor fostered a learning environment that was respectful of all students.**Comments from Students**

1. [A] He welcomed questions and made sure to answer them fully. It felt okay to not know and to ask questions.

Overall, my instructor was effective.**Comments from Students**

1. [A] He took the time to elaborate on more difficult concepts.

I would recommend my instructor to another student.

Comments from Students

1. [A] You want a dependable instructor for this kind of online course.

Essay Question Comments

Essay Questions on the Appraisal

Please add your overall thoughts on the course and instructor.

1. Mr. Yu is an amazing instructor, he is very responsive to helping his students and tries to make the best learning environment possible. I have learned the concepts in Math 142 very easily with his help.
2. I am by no means a math fanatic, but this professor helped me understand math so much better than any other professor I had. He was a joy to be around and really made sure that the students understood the concepts well and that we did well in the class. He even tailored the class towards everyone's needs and that speaks volumes. I highly recommend this professor.
3. Although I have never been much of a "math person" the professor made all the difference for my understanding. He explained concepts clearly, allowed and answered many questions from students, and worked with us to enable our success in the class. One of my favorite professors! And the online structure of the class worked well. Exams were executed well despite the difficulty presented by distance learning. Overall, a great course and a fantastic instructor.
4. Instructor was efficient at getting information to us clearly in this short semester. He cared about whether we understood the information or not and how we were doing in the class.
5. I love this professor. It is possible I might fail but wouldn't recommend another professor. He understands how hard the subject is and is willing to work with you if you can put in the work for him.
6. I really enjoyed this class. Unfortunately, I can't take any more math classes before I graduate, but I would take another class with Instructor Yu if I could.
7. This course was and is very hard especially during the summer and only for 5 weeks. Everything had to be rushed, but my professor has done all that he can to help us understand different topics and things we need to know. I just felt like no one could help with time and how much material there was to learn. Studying for this course and taking other courses is hard in itself, so I didn't have much time to study for this class. My professor was great and helped whenever he could because he knew how hard it would be from the beginning.
8. The professor was amazing! I have already recommended him to a friend who is taking Math 142 next semester.
9. Nice teacher

TAMU Student Course Evaluation

1

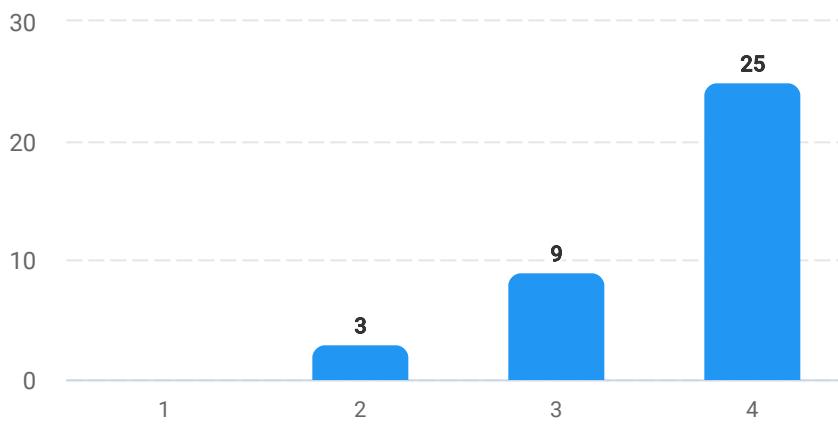

Begin this course evaluation by reflecting on your own level of engagement and participation in the course. What portion of the class preparation activities (e.g., readings, online modules, videos) and assignments did you complete?

(Multi-Choice, Single Answer)

Value Option

		Total
1	<50%	0
2	50-70%	3
3	71-90%	9
4	>90%	25

Average	3.59
Median	4.00
Mode	4
Std. Dev.	0.63
Variance	0.40

Student Comments:

- I completed all the homework, bu I fell behind in reading the chapters in the book.

Word Cloud Not Available

No text to process or the text does not contain words occurring at least 2 times.

*

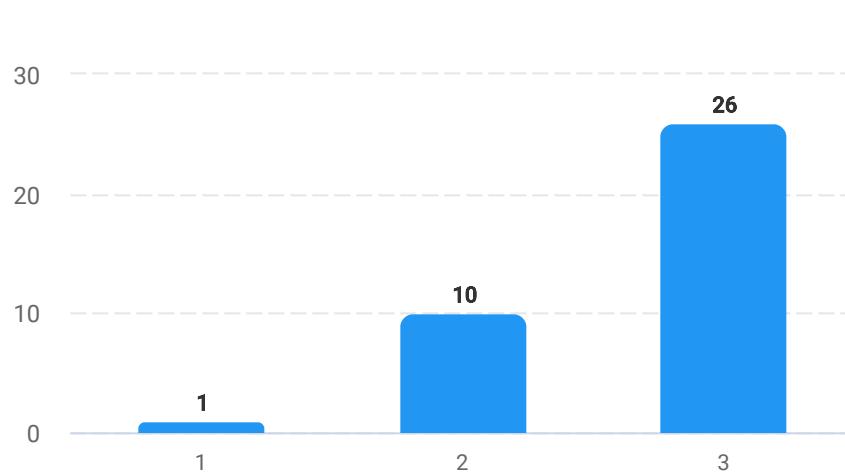

2

Based on what the instructor(s) communicated, and the information provided in the course syllabus, I understood what was expected of me.

(Multi-Choice, Single Answer)

Value Option	Total
1 No, I did not understand what was expected of me.	1
2 I partially understood what was expected of me.	10
3 Yes, I understood what was expected of me.	26

Average	2.68
Median	3.00
Mode	3
Std. Dev.	0.52
Variance	0.27

Student Comments:

- A few things changed since the syllabus, but my instructor would explain and answer questions in class.
- His English is poor and could use some practice. It would also be a good idea for him to have all of his work proof read by a native English speaker.
- I believe there was language barrier. It was not impossible to understand what was going on, but at times it was certainly difficult.

english

5 Please rate the organization of this course.

(Multi-Choice, Single Answer)

Institution Question

Value Option		Total
1	Not at all organized	4
2	Slightly organized	7
3	Moderately organized	18
4	Very well organized	8

Average	2.81
Median	3.00
Mode	3
Std. Dev.	0.90
Variance	0.80

Student Comments:

- Little to no confusion about what the concepts on the tests would be
- Was very well organized, but due dates for homework's and sometimes quizzes would change or get pushed back.
- A lot of communicating about how the week's quizzes or tests would be administered took place before class, and if you didn't get to class early you would miss critical information. That was not cool at all.
- Most of the disorganization was due to the issue of exams being online, however it did get sorted out.

2 Disagree	7
3 Neither agree nor disagree	3
4 Agree	13
5 Strongly agree	10

Average	3.49
Median	4.00
Mode	4
Std. Dev.	1.35
Variance	1.82

Student Comments:

- Always asking if we understood what steps he just did and would explain and discrepancies. We were comfortable enough to ask him to re-write things that were illegible.
- This course was a hot mess. On a daily basis and multiple times each class, Byeongsu would make mathematical errors while trying to teach us math concepts because he tried to do math in his head rather than use a calculator. We constantly had to correct his mistakes throughout the class. There was one day in class where he taught a concept for an hour and it was completely wrong, so we had to watch an additional video of him teaching the concept the correct way. Many times, he would blow through a concept really quickly, leaving me lost and confused, especially when it came to homework and quizzes. Additionally, there was a little bit of a language barrier, and his accent made it harder to understand some of the concepts he was teaching. I would not let him teach another class.
- If you had any question, or generally misunderstanding of concepts, he was there 24/7 to answer
- He was a bit difficult to understand, I decided to participate in person rather than zoom. It was a bit easier for me to understand and hear him correctly.
- Professor really cares about his students expect his style of reach was very sporadic & hard to follow. As well as, very poor hand writing so the notes provided are very challenging to follow.
- Very difficult to understand, taught things wrong in class that had to be corrected later, underprepared, always shifting and changing how things were to be done (ie proctoring the exams)

concept concepts things
 bit class had

correct times
 always teach math rather taught wrong really
 follow difficult teaching

2 Contributed a little	12
3 Contributed a lot	17

Average	2.24
Median	2.00
Mode	3
Std. Dev.	0.79
Variance	0.62

Student Comments:

- Yes! One of the kindest professors who actually wanted you to learn and was understanding of technical difficulties during this covid era.
- Working through problems in class really helped me understand the material.
- Especially when I went to office hours.
- There were multiple times during the semester where I would attend class, we would take notes, and then receive an email that evening apologizing for teaching the concept incorrectly. This was frustrating and contributed a lot of additional stress and time to make up for incorrect teachings. Homework can be frustrating when you follow the concepts taught in class, but still get them wrong, to later find out that it was taught incorrectly.
- Sometimes it was hard to fully understand what was being said over zoom, however it was easy to follow along the writing of notes.
- I started doing better when I stopped watching the lectures and had a friend help me go over the completed lecture notes

Student Comments:

- I had a frustrating experience with the WebAssign Homework system because it listed too many of the same type of problems back-to-back, making the whole experience monotonous. It also listed types of problems that were not covered on the lecture notes, so I often had to guess at a question. The tools were confusing to figure out at first, and the system would count certain answers incorrectly when I didn't choose a certain button. Basically, a physical homework worksheet would have been more efficient and practical because math requires us to write out the problems on paper, anyways.

What did your TA do that you found particularly helpful?

(Instructor Text/Memo)

Department Question

Byeongsu Yu Teaching Assistant

- He was very clear in his explanation of the concepts.
- Doing some examples for the Python lab.
- He prepared us well for the quizzes and was very helpful when it came to trying to figure out the more advanced codes on the Python labs. If we had questions, he would stay for as long as possible to answer them, even if that meant staying past the class time.

What did your TA do that you found particularly helpful?

(Instructor Text/Memo)

Department Question

- Did problems with new concepts and then left us to practice those concepts on subsequent problems rather than doing none or doing all of the problems
- He was very receptive to questions and answered them effectively and astutely.
- open to questions
- He would explain python programing as if the software was a human trying to understand code
- Was very receptive to questions and encouraged the students to ask him questions and work together.
- Explain and work out problems before assigning similar ones.
- Used others screens to workout problems and hosted test reviews.

TAMU Student Course Evaluation

1

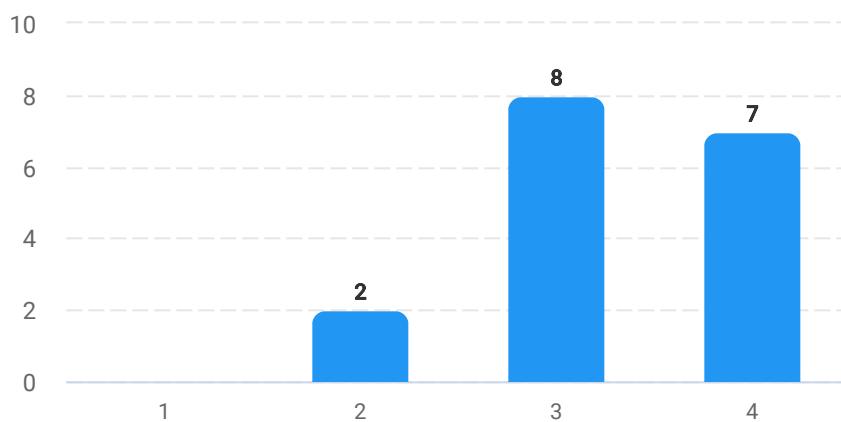

Begin this course evaluation by reflecting on your own level of engagement and participation in the course. What portion of the class preparation activities (e.g., readings, online modules, videos) and assignments did you complete?

(Multi-Choice, Single Answer)

Generated by AEFIS. Developed by [AEFIS, Inc.](#)

4

In this course, I engaged in critical thinking and/or problem solving.

(Multi-Choice, Single Answer)

Institution Question

Value Option	Total
1 Never	0
2 Seldom	0
3 Often	3
4 Frequently	14

Average	3.82
Median	4.00
Mode	4
Std. Dev.	0.38
Variance	0.15

Student Comments:

- As the semester progressed, both the professor and TA asked more questions during their lectures and this was very helpful.

Word Cloud Not Available

No text to process or the text does not contain words occurring at least 2 times.

*

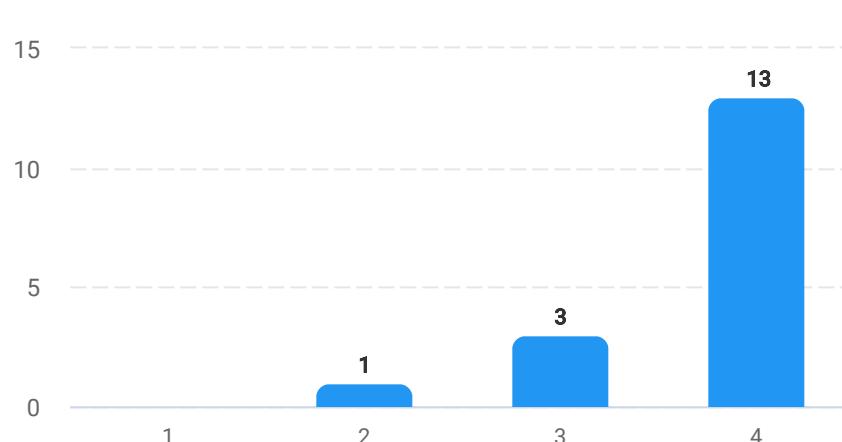

5

Please rate the organization of this course.

(Multi-Choice, Single Answer)

Institution Question

Value Option	Total
1 Not at all organized	0
2 Slightly organized	1
3 Moderately organized	3
4 Very well organized	13

Average	3.71
Median	4.00
Mode	4
Std. Dev.	0.57
Variance	0.33

Student Comments:

- organization was good, but sometimes changes in due dates for assignments were confusing
- Everything was kept on a schedule and the few changes that were made were clearly and quickly communicated. All assignments, labs, quizzes, and exams were easy to locate and complete.

2 Disagree	0
1 Strongly Disagree	2

Average	3.65
Median	4.00
Mode	4
Std. Dev.	1.19
Variance	1.40

Student Comments:

- In chemistry we used a system that would provide you with a step by step explanation of the problem when you would get it wrong. I believe it was called ALEKS. I'm not sure if this program could be used for a math course as well. Sometimes when I would get a problem wrong on WebAssign and I couldn't figure out what I did wrong it was very discouraging. I feel a system that aids in the learning process and isn't just like a test of sorts would be a greater asset to the students.
- I've used Webassign for a few college classes now and I believe this is the first time the professor hasn't had to change or remove a problem from the homework because Webassign and the teacher had different methods. In that regard, I liked the way the homework reflected the work we did in class and was also similiar to the problems that were on the quizzes. The biggest difference was between the homework and the exams. The exam questions were not much like the homework problems, but besides that, the homework did a good job of reinforcing the concepts learned in class.

Student Comments:

- Same as what I said with Professor Lockhart, if he was teaching Calc II in the fall, I'd make sure to be in his class!

Word Cloud Not Available

No text to process or the text does not contain words occurring at least 2 times.

36

What did your TA do that you found particularly helpful?

(Instructor Text/Memo)

Department Question

- He was very receptive to answering questions on his thought process and how he would solve problems with concepts we would learn in class.
- Always willing to help someone if they had an error on their code.
- The thing I found helpful from the TA was that he would work through any problems that were asked and if someone didn't understand the process he would explain it in multiple ways till they understood it.
- He always made sure we didn't have any questions before we moved on.
- He would tell us to screen share if there was an error and would help fix it. He also helped me with the labs outside of class via emails and zoom.
- Allowed students to share screen in lab to walk through possible issues.
- With the labs, he explained how Python works, not just telling us the answers to every question. With every lab, he built off of previous ideas so that we could see the different ways to use Python for so many different types of problems and he encouraged us to relate the Python labs to the work we were doing in the lectures. He was also very helpful with reviewing before exams and wanted to answer any questions anyone had.
- He would wait for us to catch up and come up with a questions before moving on
- Allowed us to bring him questions and reach him outside of class.

share screen ways through work helpful error someone help process
questions labs
outside lab class every different problem

37

What, if anything, could your instructor have done to better facilitate your learning in this course?

(Instructor Text/Memo)

Department Question

38

Please add your overall thoughts on the course and instructor.
